

## **When science creates a monster**

### **2. The monstrous creature is born!**

I had wanted to make a beautiful man, but the face of the creature was horrible. Its skin was thin and yellow, and its eyes were as yellow as its skin. Its long black hair and white teeth were almost beautiful, but the rest of the face was very ugly.

Its legs and arms were the right shape, but they were huge. I had to use big pieces because it was too difficult to join small pieces together. My creature was two and a half meters tall. I joined the body to the wires from my machine. I was sure my machine could use electricity from lightning to give life to the body. After a few minutes I saw the creature's body begin to move. Slowly, terribly, the body came alive. Its arms and legs began to move, and slowly it sat up.

The dead body had been an ugly thing, but alive, it was much more horrible. Its yellow eyes were looking at me, its mouth opened and it made strange sounds at me. On its yellow face, there was an awful smile. One of its huge hands reached towards me.
