

Build your own contraption

2 Bits and pieces

p. 108 –  CD classe 3 piste 35 –  piste 45

Hi everyone! I've invented the most awesome way to feed my dog, just by building a simple machine. First I place a paper towel tube on my kitchen table and incline it using a chair. When I drop a marble into the tube, it rolls down onto the table and knocks over a series of dominoes. The dominoes set a small red truck in motion, and the truck runs into a delicious dog biscuit, knocking it onto the floor. Then my dog, Scruffy, runs over to eat it up. He's as happy as can be, and so am I: my invention definitely makes my friends and family laugh! Using my Rube Goldberg kit, try to ring a bell, or have fun with your cat!
