

## Unit 5 – Focus on

### 1. Smarter than you think

p. 60 – CD 2 piste 14 –  n°21

**Radio host:** Welcome to our morning programme. “What kind of pupil are you?” That’s what our reporter asked to a few students just in front of their high school. What are they favourite subjects and how do they study?

**Jess:** I’m Jess. At school, Music and Languages are my favourite subjects. I have a passion for reading and writing. I learn better by saying, hearing or singing!! Sometimes I sing my lessons to memorise them and it works really well! My teachers say I could be a great poet or a terrific actress!

**Noah:** I’m Noah. My problem?! I can’t stay seated nor silent for more than a minute! I constantly feel the need to move, touch, interact! I repeat my lessons aloud and walk up and down my bedroom at the same time.

**Journalist:** It seems you’re bodily kinesthetic.

**Noah:** Pardon? “Bodily” what?

**Journalist:** Bodily ki-nes-the-tic.

**Noah:** Oh! Well, I don’t know. I am very talkative, for sure. I love spending hours chatting with my friends!

**Journalist:** What do you want to be later?

**Noah:** My mother always says I would be a great PE teacher.

**Andrea:** I am Andrea. I am totally into experimenting.

**Journalist:** What do you mean? What are you good at?

**Andrea:** I am nuts about Art and Science. I learn better by doing mind maps or by sketching.

**Journalist:** I am sure you could be a good architect or designer.

**Andrea:** Well, I still haven’t found my dream job!

**Lizzie:** My name is Lizzie. I love being alone and I’m also keen on nature. I learn better by working on my own, making graphs, lists... Later, I want to be a biologist or a psychologist, a job where you are pretty independent.
